

Questions

Slide 3

- Why is epigenetics important?
- What is the function of RNA polymerase II?
- How does what I do translate to humans?
- How is DNA formed?

Slide 4

- What does it mean to plate seeds?
- Why is it important to extract DNA?
- What is a control and experimental?
- How does a gel electrophoresis work?

Slide 6

- What are trained networks?
- What are molecular mechanisms?

Slide 7

- What is the importance of running commands on supercomputer instead of personal computer?

Slide 8

- How to deal with rejection?
- How to maintain a network?
